PILOT

PRODUCT INFORMATION

Identifies the approximate line width.

Identifies the ball size.

Archival safe - suitable for use in photo albums.

Indicates that the pen is refillable.

Designed to compensate for rapid changes in air pressure, an aeroplane-safe pen won't leak in flight.

Enjoy smooth writing performance right down to the last drop of ink, thanks to the advanced liquid ink UNI-FLOW SYSTEM. Excess ink flow from the ink reservoir can be temporarily stored to ensure consistent ink flow to the pen point.

Indicates the recycled content of the pen. The percentage of recycled material used in the pen is based on the weight of recycled material divided by the actual weight of the pen, excluding ink and refill.

Ink that is waterproof, fade/light-resistant and vibrant in colour.

Ultra-fast ink drying for smudge-free writing.

A soft rubber grip for fatigue-free writing and user comfort.

An impact-absorbing silicone gel grip, for supreme writing comfort.

Pen Type

Gel Ink Rollerball

Characteristics

Uses a dense water-based ink that allows smooth writing in a variety of colours.

Gel inks have a smooth flow, and don't smudge on paper. Utilises a twin-ball mechanism to control ink flow. Uni-ball 'UM' pens use gel ink.

Liquid Ink Rollerball

Writes like a fountain pen, and utilises a reservoir system to control ink flow. Excess ink can be temporarily stored, to ensure constant ink flow to the pen point. Uni-ball 'UB' pens use liquid ink. See the Croxley price book for a complete list of pen codes.

Ballpoint

Oil-based, pigment ink. Ballpoints are the most economical way to write large volumes, as they have a long write-out distance and a long shelf life.

Fibre Tip

Nibs are made of polymer plastic, and are usually for more detailed writing, graphic design and technical drawing.

Pigment Ink Properties

Uni-ball pens generally utilise water-based pigment inks. Pigment inks are water-resistant, smudge-proof when dry, and will not fade under continuous exposure to light. Pigment ink is acid-free, and safe to use on archival documents.

WARWICK PENS

WARWICK BALLPOINT PENS

Smooth rubberised grip for extra comfort. Available in 3's as a hangsell blister pack with retractable nib or in 10's in a hangsell box with capped pens.

UNI JETSTREAM PENS

UNI JETSTREAM

The new sensation – the power of speed writing!

A fantastic combination of the ballpoint and rollerball pen technologies, Jetstream pens...

...are ultra-smooth flowing.

...have a vivid writing line.

...and are completely smudge free.

Jetstream pens are smoother than oil-based ballpoints, and faster drying than water-based ink. It is the first rollerball pen that even left-handed writers can use without smudging.

Enjoy the best writing performance in Uni history!

UNI JETSTREAM PREMIER PENS

Jetstream Premier offers a new level of writing comfort, with a retractable soft touch air click mechanism and quick drying ink that does not smudge.

UNI POWER TANK ECO PENS

The new PowerTank eco is made from recycled materials. The barrel is made from recycled polycarbonate, while the grip is made from a mixture of resin and sawdust from Uni's pencil-making operation. The Uni PowerTank eco features a pressurised refill which allows it to write in extreme conditions – on wet paper, horizontally, upside-down, in temperatures as low as -20 degrees, most importantly, in the zero gravity of outer space!

UNI CHALK MARKERS

The uni Chalk Marker is a non-permanent marker pen which writes on, and is easily removed from, chalk boards, windows, and other non-porous surfaces including metal and plastic. Available in 6 colours, the uni Chalk Marker overcomes the shortcomings of normal chalkboard markers and creates writing that is weather resistant, but which can be easily cleaned off with a damp cloth. The uni Chalk Marker produces vividly coloured writing using water-based paint.

FRIXION^{ball} CLICKER

PILOT **FRIXION^{ball}** CLICKERS PENS

The new FriXion Clicker adds the convenience of a retractable to the FriXion range of amazing erasable pens. FriXion Clicker uses the same brilliant thermosensitive ink as the rest of the range. It erases cleanly and completely – simply via the heat generated by friction. There's a neat little design detail where the 'X' in the FriXion logo turns from barrel colour to yellow when the tip is extended. FriXion Clicker 07 features a barrel colour that matches the ink colour

PILOT BEGREEN PENS

EARTH-FRIENDLY WRITING INSTRUMENTS FROM PILOT

MADE FROM RECYCLED MATERIALS

- BEGREEN is the world's first range of earth-friendly writing instruments.
- Manufactured by Pilot and made from recycled post-industrial materials, each Pilot BEGREEN product performs to the same high quality that you've come to expect from all Pilot writing instruments at no extra cost. Pilot BEGREEN retail prices are equal to their non - recycled counterparts.
- All Pilot BEGREEN products are composed of at least 70% recycled material and are available in a complete range of writing instruments - Gel Ink Rollerball, Liquid Ink Rollerball, Ballpoint and Permanent Markers.
- Look out for the recycling icon ♻️ to understand the percentage of the recycled material in each pen.
